Subject: Site Survey Findings and Allocation of Concrete Batching Plant

With reference to the meeting held on 25 August 2025, and to the topographic survey of the project land (Attached Document no. SAMCO-PCO-DS-SUR-001-R00-SAMCO-PCO-DS-SUR-002-R00),

kindly be informed of the following:

SK

1- The topographic survey revealed that excavation works have not reached the project boundaries, with a deviation of approximately nine (9) meters towards the Ring Road compared to the one (1) meter replacement layer offset for buildings B01 to B04.

{ACE-PM Respond} First and foremost, we would like to express our sincere thanks and appreciation for your efforts.

Kindly note that the results of the consultant's review, as recorded on the form submitted (DS) to them in this regard, shall be binding on all parties and will serve as the basis for proceeding with the works. This is to ensure the preservation of rights and to commence the works in accordance with what was agreed upon during the aforementioned meeting.

2- An overlap was identified at the far end of the project between buildings B09, B10, B11, B16, and B17, and the backfilling behind the fence of the Stone Park project, as shown in the attached document.

{ACE-PM Respond} Kindly note that the outcome of the consultant's review, as recorded on the form submitted (DS) in this regard, will be reviewed by the designer (representing the Owner), and you will be informed accordingly.

3- Certain modifications are required for the service ramp, including widening and level adjustments. The revised drawings will be prepared, and the corresponding cost estimate will be submitted once finalized.

{ACE-PM Respond} No objection, provided it is in accordance with what was agreed upon during the aforementioned meeting.

4- Regarding the concrete batching plant, a drawing showing the designated location within the project premises is provided (The location was designated by the owner).

Please note that, should you request a change of location or removal of the batching plant after its installation at the designated area and prior to completion of the assigned works, the owner shall bear all costs associated with relocation, removal, and related requirements. In such case, the project duration will be extended to account for any delays resulting from dismantling and reinstallation activities.

{ACE-PM Respond} The owner's representative "Eng. Mostafa Galal", after reviewing the matter with him, stated that the Owner will take all of your concerns into consideration before issuing the final approval for the concrete batching plant site.

Furthermore, and in line with the agreement reached during the meeting, the commencement date for Zone 2 works (comprising 13 buildings) has been scheduled. The actual execution on site shall begin upon full handover of the land from your side, with the Commencement Date becoming effective three (3) months thereafter.

{ACE-PM Respond} This will be carried out in accordance with the terms of the Contract.

SK

We kindly request your review and necessary guidance on the above, and we greatly appreciate your usual cooperation.
