

Ref No.: BD-ACEPM-SAMCO-LET-013

Date: Sunday, 05th of October 2025

To: SAMCO National Construction Company

Attention: Eng. Mohammed Sami Mohammed (Project Manager)

Project Name: The Big Business District

Contract/Package: Construction Works of the Civil Works for Buildings B1, B2, B3 and B4

Subject: Re: Soil Replacement Recommendation

Reference (S):

- 1) Contractor's Letter Ref. BD-CW-SAMCO-Roya-LET-003 dated 29/09/2025
- 2) Contractor's Email The Big - (Ground tank foundation recommendations) – Dated 10/08/2025
- 3) MOM for Coordination Meeting No. 1 – Dated 28/09/2025
- 4) Email The Big Project: (Ground tank foundation recommendations) Dated:14-8-2025

Dear Sir,

With reference to the above-mentioned subject and in response to the Contractor's Letter Ref. No. 1, please be informed that the Contractor's consultant's recommendations (Ref. No. 2) have been forwarded to the Employer's geotechnical consultant, Civitech, who reviewed and responded via Email reference (4).

In light of the above, the Contractor is instructed to proceed in accordance with Civitech's comments and recommendations.

Should any further discussion or clarification be required regarding this matter, ACE-PM may arrange a coordination meeting between all concerned parties, following the approach agreed in the meeting held on 28 September 2025 (Ref. No. 3).

Yours faithfully,
Eng./ Abdelaziz Mohammed.

Project Manager,
ACE Project Management

Subject: RE: The Big - (Ground tank foundation recommendations).

Dear Eng. Mostafa,

In reference to the received letter regarding the recommendation of aforementioned issues received from A&A consultants, kindly consider the following comments.

- **Notes 1, 2 and 4:** There is no need for soil replacement layer at the level of the ground tank foundation. Soil at this level (+198) is dense sand with high SPT values and would be much better than any imported soil. However, it is acceptable to be submerged with water for 24 hours and compacted before placement of tank foundation.
- **Note 3:** Static plate load test has been performed in this area at level +201 and test results were submitted on August 12, 2025. And you can find it attached to this mail. However, CPT tests will be performed covering this area at the foundation level to ensure well compacted soil layers and required bearing capacity.
- **Note 6:** we agree with this recommendation.
- **Notes 5, 7, 8, and 9:** We agree with Notes 5,7,8,9 and they match recommendations issued on our soil Report No 09Geo/2025 issued on 23/07/2025, and you can also find it attached to this mail.

Best regards,

Rawnaa Badr
